A - Algas microscópicas más comunes en el agua dulce

1 . Clorofíceas (algas verdes)

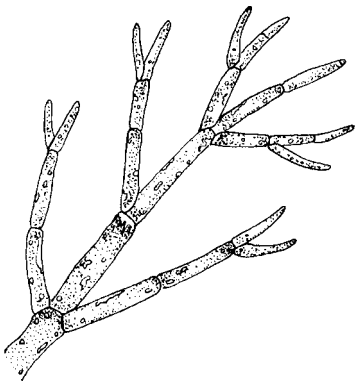

Chaetophora

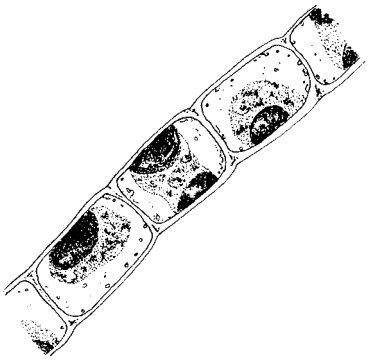

Myxonema

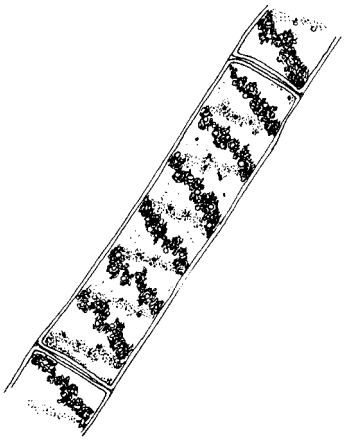

Cladophora

Hormidium

Spirogyra

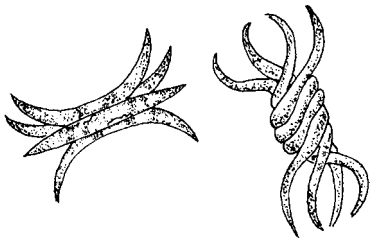

Ulothrix

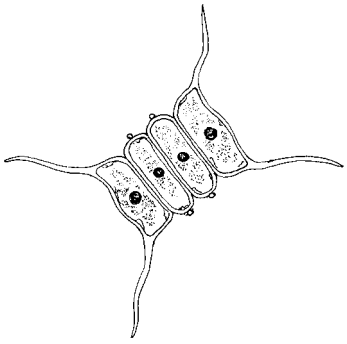

Zygnema

Ankistrodesmus

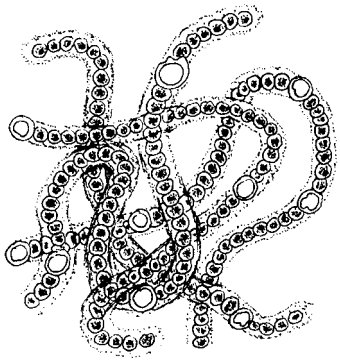

Scenodesmus

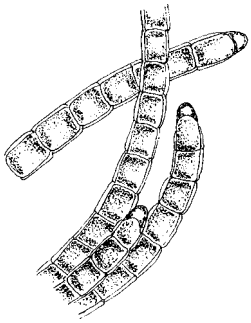

2 . Cianofíceas (algas azules)

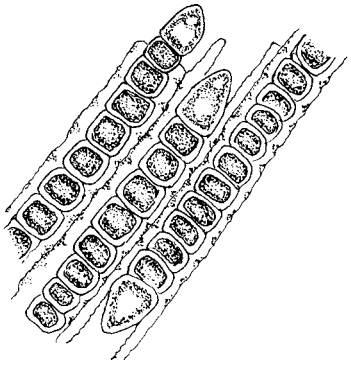

Nostoc

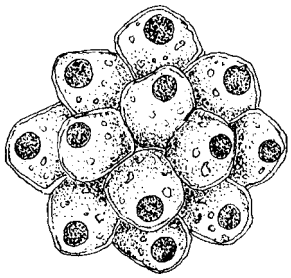

Ocillatoria

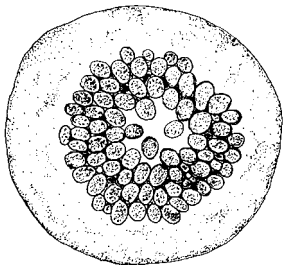

Hormidium

Coelastrum

Coelosphaerium

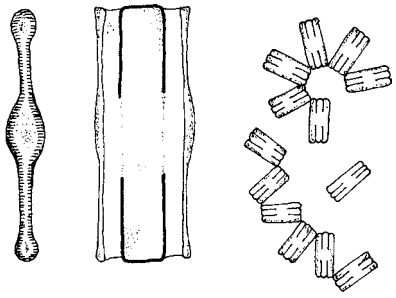

Anabaena

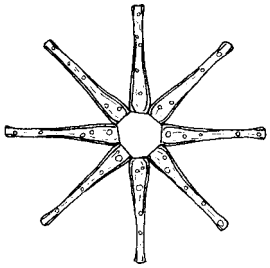

3 . Diatomeas

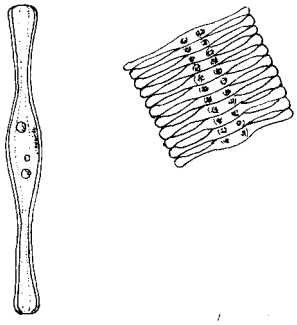

Tabellaria

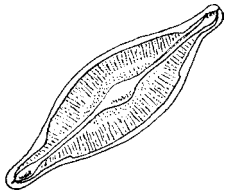

Asterionella

Fragilaria

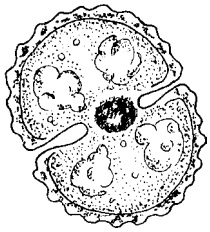

Navícula

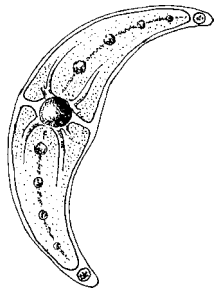

4 . Desmidiáceas

Cosmarium

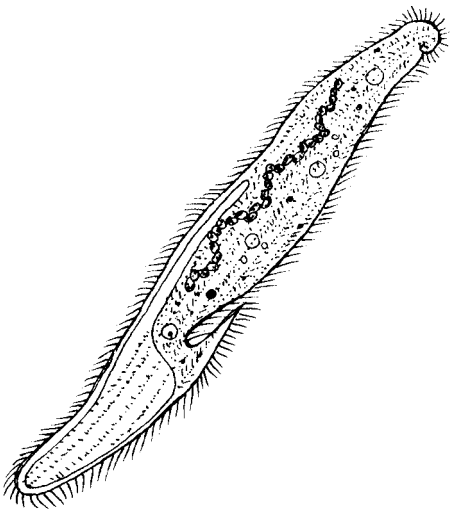

Closterium

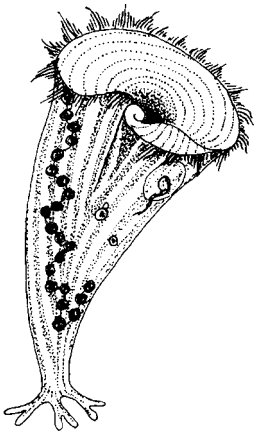

B – Protozoos comunes en el agua dulce

1 . Protozoos ciliados

Spirostomum

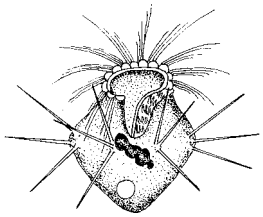

Stentor

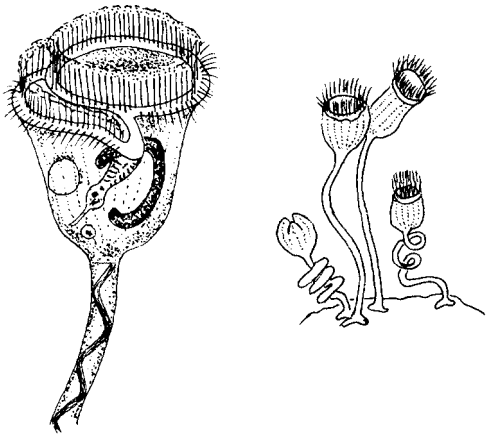

Colpidium

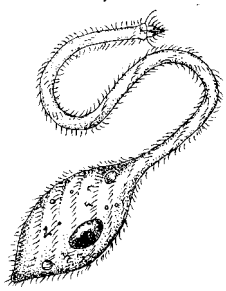

Halteria

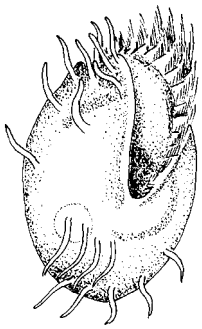

Vorticella

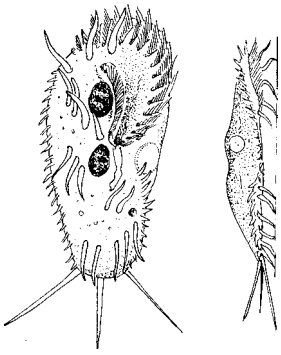

Lacrymaria

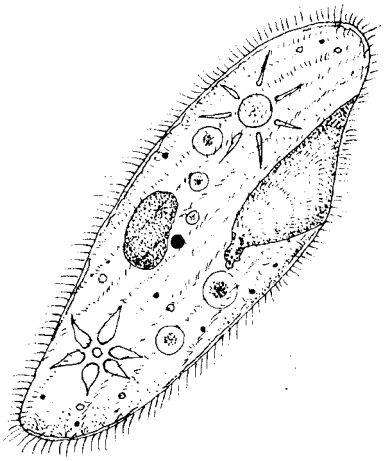

Euplotes

Stylonychia

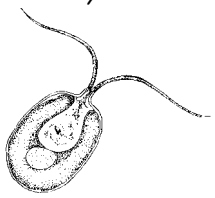

Paramecium

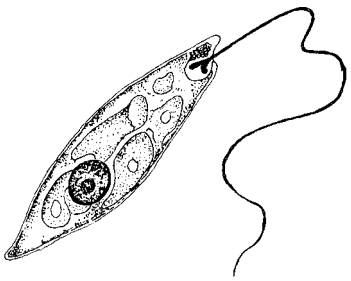

2 . Protozoos flagelados

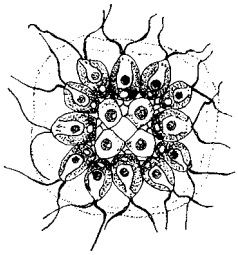

Chlamydomonas

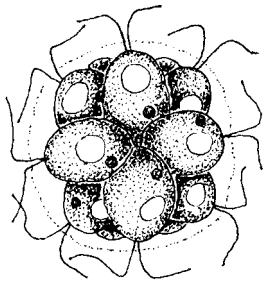

Euglena

Gonium

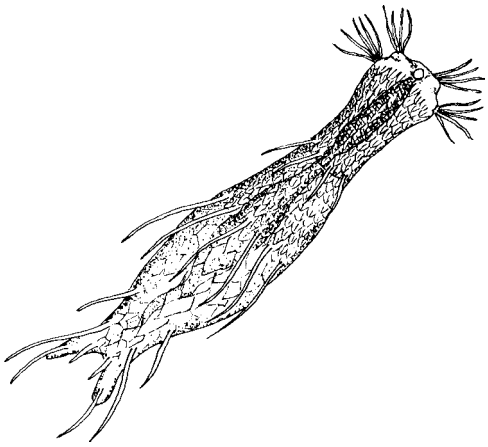

Pandorina

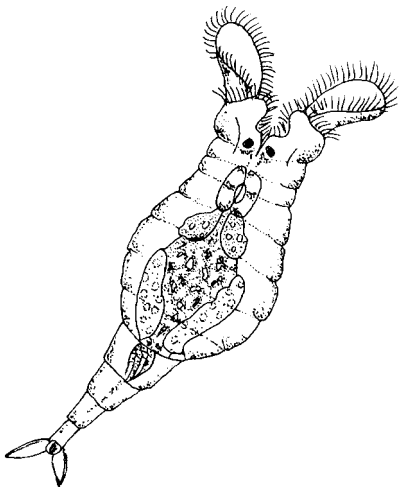

C – Metazoos de vida acuática

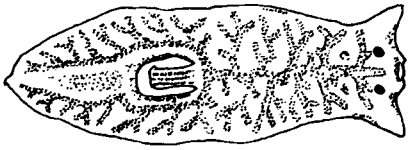

Gastrotrico *(Chaetonotus)*

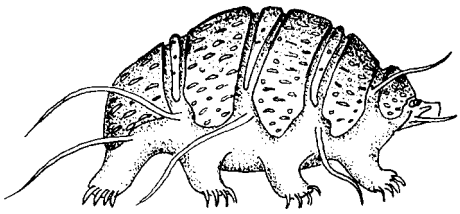

Rotífero *(Philodina)*

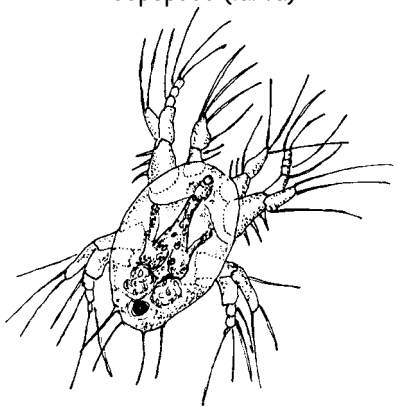

Platelminto *(Planaria)*

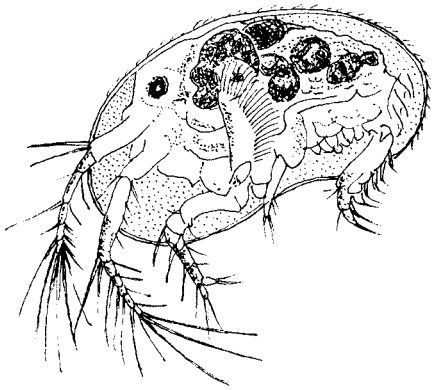

Tardígrado *(Echiniscus)*

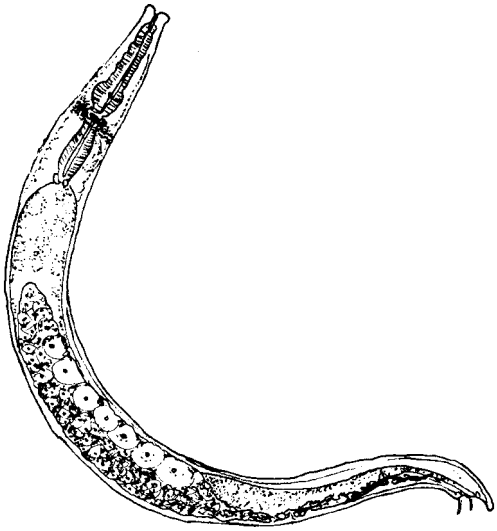

Copépodo (larva)

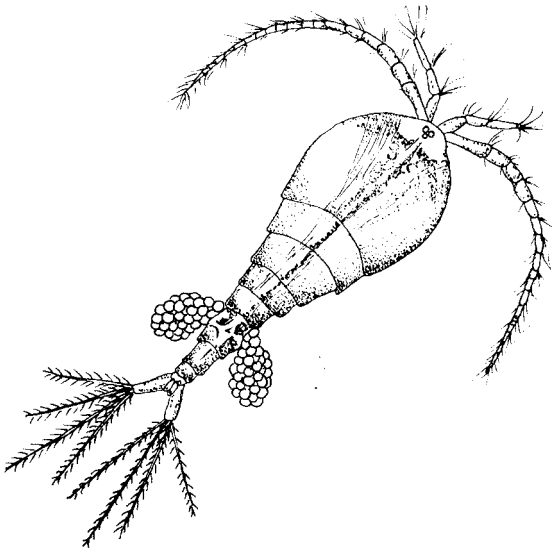

Ostrácodo

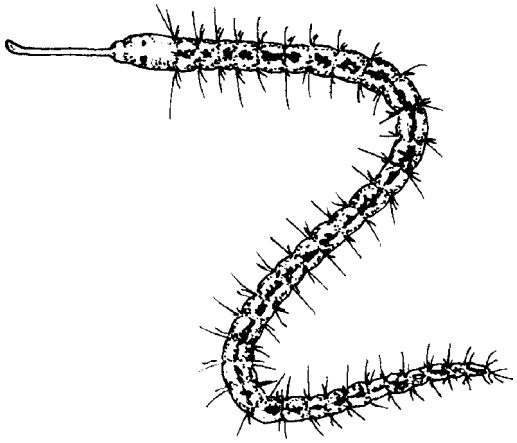

Nemátodo

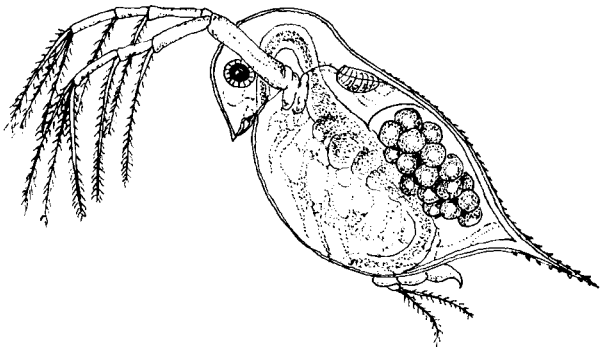

Copépodo

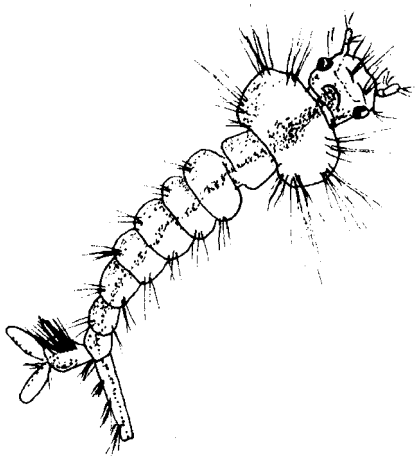

Stylaria

Daphnia

Larva de insecto

Larva de insecto
